ACE Program (Advancements in Clinical Excellence)
CONTINENCE MANAGEMENT

The ACE Program (Advancements in Clinical Excellence) at Plymouth Care Center in September is Continence Management. This is an important new program for the treatment of bladder control or "Urinary Incontinence," a condition affecting nearly 20 million Americans. Our new Bladder health Program follows the government's "Agency for Healthcare Research Quality" guidelines and was developed specifically for the complex needs of geriatric patients. The program is non-invasive and medication free, utilizing specialized therapeutic equipment that has been used for more than a decade. The treatment program typically takes from six to twelve weeks and is covered by most insurance providers, including Medicare.

If you, your loved one, or someone you know would benefit from this program, please contact our therapy department today. Even if you are not a resident of Plymouth Care Center, you can come in as an outpatient and receive therapy services that are covered by Medicare.

Saturday, September 11 • 10am-4pm

Vote Tuesday, September 14th

Together we can... keep Sheboygan County a great place to raise a family.

Fellow Citizens...

It's time for law enforcement to become pro-active. This is accomplished by a department-wide philosophy of community policing.

Taxpayers are facing tough times. Part-time deputies can be used as bailiffs, to transport prisoners and for civil process allowing more deputies to be on patrol. Administrative positions can be reduced.

Working together we will identify and solve community problems.

Success of the Sheriff's Department will be gauged by the absence of crime.

I will bring transparent leadership you can believe in.

Todd Priebe
